RE: ISD HS#4 & GS#17 Request for Deviation from Standards – Intersection Spacing

Todd,

We have reviewed the request to deviation from the City of Issaquah 2010 Street Standards (Standards) concerning intersection spacing. Only intersection spacing within the City of Issaquah jurisdiction have been considered. We have noted that Providence Loop Road is a pre-existing condition and will be used for emergency access. After careful consideration, the request as described in your updated letter, dated August 26, 2021, is approved subject to the following condition – if at any point Providence Loop Road is used for general purpose access it shall be right-in and right-out.

Sincerely,

A handwritten signature in blue ink, appearing to read "Doug Schlepp".
